Your treating practitioner has recommended that you use Repromed Laboratories i.e. NEST. You are free to choose your own pathology provider. However, if your doctor has specified a particular pathologist on clinical grounds, a Medicare rebate will only be payable if that pathologist performs the service. You should discuss this with your doctor.

Medicare Assignment
(Section 20A of the Health Insurance Act 1973). I offer to assign my right to benefits to the approved pathology practitioner who will render the requested pathology service(s) and any eligible pathologist determinable service(s) established as necessary by the practitioner.

Informed Consent My signature on this form indicates that I have read or have had read to me the information about the nest test and I consent to having the test performed on my blood. I understand that this test is a screening test for selected abnormalities of chromosomes 21, 18 and 13. In addition, I understand that I can also elect to have the sex chromosomes tested which can screen for less serious selected abnormalities of the sex chromosomes and I can also elect to have fetal gender reported. I have had the opportunity to ask questions and discuss limitations of the test with my health care provider or someone that my healthcare provider has designated. I understand that should my test come back with a 'high probability' finding that this result should be confirmed by further testing (chorionic villus sampling or amniocentesis). I also understand that sometimes this testing is unable to provide a result due to biological factors and in this instance I will be provided with a refund.

ATTENTION: DOCTORS/NURSES/PHLEBOTOMISTS

DECLARATION: I certify that I collected the accompanying sample from the above patient whose identity was confirmed by enquiry and/or examination of their name band and that I labelled the sample immediately following collection.
